## Preferred Drug List

The **Preferred Drug List** is a guide within select therapeutic categories for clients, plan members and health care providers. **Generics should be considered the first line of prescribing.** If there is no generic available, there may be more than one brand-name medicine to treat a condition. These preferred brand-name medicines are listed to help identify products that are clinically appropriate and cost-effective. Generics listed in therapeutic categories are for representational purposes only. This is not an all-inclusive list. This list represents brand products in CAPS and generic products in lowercase *italics*.

### PLAN MEMBER

Your benefit plan provides you with a prescription benefit program. Ask your doctor to consider prescribing, when medically appropriate, a preferred medicine from this list. Take this list along when you or a covered family member sees a doctor.

#### Please note:

- Your specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document.
- For specific information regarding your prescription benefit coverage and copay<sup>1</sup> information, please contact a US Script Customer Service representative toll-free at 1-800-460-8988.
- US Script may contact your doctor after receiving your prescription to request consideration of a drug list product or generic equivalent. This may result in your doctor prescribing, when medically appropriate, a different brand-name product or generic equivalent in place of your original prescription.
- In most instances, a brand-name drug for which a generic product becomes available will be designated as a non-preferred option upon release of the generic product onto the market.

### HEALTH CARE PROVIDER

Your patient is covered under a prescription benefit plan. As a way to help manage health care costs, authorize generic substitution whenever possible. If you believe a brand-name product is necessary, consider prescribing a brand name on this list.

#### Please note:

- Generics should be considered the first line of prescribing.
- This drug list represents a summary of prescription coverage. It is not all-inclusive and does not guarantee coverage.
- The member's prescription benefit plan may have a different copay for specific products on the list.
- Unless specifically indicated, drug list products will include all dosage forms.
- Contact a US Script Customer Service representative toll-free at 1-800-460-8988 to check coverage and copay information for a specific medicine.

#### ANALGESICS

##### § NSAIDS

*diclofenac*  
*meloxicam*  
*naproxen*

**FOR YOUR INFORMATION: Generics should be considered the first line of prescribing.** This drug list represents a summary of prescription coverage. It is not all-inclusive and does not guarantee coverage. In most instances, a brand-name drug for which a generic product becomes available will be designated as a non-preferred option upon release of the generic product onto the market. Specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document. The member's prescription benefit plan may have a different copay for specific products on the list. Unless specifically indicated, drug list products will include all dosage forms. This list represents brand products in CAPS and generic products in lowercase *italics*. Generics listed in therapeutic categories are for representational purposes only. Listed products may be available generically in certain strengths or dosage forms. Dosage forms on this list will be consistent with the category and use where listed. Please contact US Script Customer Service toll-free at 1-800-460-8988 to check coverage and copay information for a specific medicine.

\* The preferred options in this list are a broad representation within therapeutic categories of available treatment options and do not necessarily represent clinical equivalency.

§ Generics are available in this class and should be considered the first line of prescribing.

<sup>1</sup> Copayment, copay or coinsurance means the amount a member is required to pay for a prescription in accordance with a Plan, which may be a deductible, a percentage of the prescription price, a fixed amount or other charge, with the balance, if any, paid by a Plan.

<sup>2</sup> For safety reasons, to prescribe Lotronex, the physician must be enrolled in the Prescribing Program for Lotronex. Physicians must understand the benefits and risks of treatment with Lotronex for severe diarrhea-predominant IBS, including the information in the Prescribing Information, Medication Guide and Patient-Physician Agreement for Lotronex. To enroll or for more information on the Prescribing Program for Lotronex, call toll-free: 1-888-423-5227 or visit [www.lotronex.com](http://www.lotronex.com) to complete the Physician Enrollment Form. US Script does not manage the Lotronex Prescribing Program or operate the website. US Script is not responsible for the availability or reliability of the website's content.
